## AGENDA

# WORKSHOP 1 ALTERNATIVE COUNTERTRADE MODELS

Date:  
17. august 2020

Writer:  
[LIN](#)/Klik her for at angive tekst.

Date: 21<sup>st</sup> of August 2020  
Location: ONLINE – VIA TEAMS (see technical details below)  
Time: 09:00 – 13:00

Dear participant,

Thank you for your participation in this 1<sup>st</sup> workshop on alternative countertrade models. Please find below a short description of the purpose of the workshop, the suggested agenda and a short description of the technical details for the online session.

In addition to this agenda, Energinet has prepared a preparatory memo, which we ask all participants to read before the workshop on the 21<sup>st</sup> of August.

## 1. Purpose of the workshops

The main purpose of the 1<sup>st</sup> workshop is for Energinet to present and open the discussions with all stakeholders. As presented in the suggested agenda below, Energinet will at the workshop present the background for the task together with Energinet's initial assessment of alternative countertrade models and the evaluation criteria which will be used to assess each of the alternative countertrade models.

Please be aware that both the presented alternative countertrade models and evaluation criteria are solely first assessments and exploration of models and can be extended or altered based on the discussions with the stakeholders at the workshops. Stakeholders will be given the opportunity to suggest other alternatives to both models and evaluation criteria during the first and second workshop.

Based on Energinet's presentations and the preliminary discussions at this 1<sup>st</sup> workshop, Energinet asks all market participants to prepare their inputs for each model for each evaluation criteria for the second workshop arranged on the 23<sup>rd</sup> of September 2020.

## 2. Agenda

#	TOPIC
1	Welcome
2	Presentation of background for the task
3	System security – Case from the summer 2020
	BREAK
4	Presentation of alternative countertrade models
